About Us

INGREDIENT

Test Item	NITROGEN	P2O5	K2O	PH H2O	MOISTURE	ORGANIC MATTER
Guaranteed Content	~3%	~2%	~2%	~5%	~10%	~75%

PRODUCT

Form: Pellets

Packing: 20kg Bag

FEATURE

01. Improves Soil Health

Rich in organic matter, it enhances the physical and chemical structure of soil and promotes beneficial microbial activity.

- Builds a healthier and more productive soil environment

02. Consistent Nutrient Release with Pellet Form

Supplied in pellet form, the fertilizer provides a steady and controlled release of nutrients, reducing leaching and ensuring crops receive what they need over time.

- Stable and efficient nutrient supply throughout the growing period

03. Long-Term Cost Savings

Improved soil fertility reduces the need for frequent fertilization, helping to lower overall input costs over time compared to chemical fertilizers.

- Economical and sustainable farming

04. Eco-Friendly and Sustainable

Low in harmful chemicals, organic fertilizer supports environmentally responsible agriculture and helps meet growing global demand for eco-friendly products.

- Ideal for sustainable farming and export-grade crops
